Alert

You are about to purchase a product that is not simple and may be difficult to understand. Our service includes products that are traded on margin and carry a risk of losses. The products may not be suitable for all investors. Please ensure that you fully understand the risks involved.

What is this product?

Type

An Over the Counter ("OTC") Derivative Contract for Difference ("CFD") where the underlying instrument is FX. An FX pair (e.g. EUR/USD) involves the simultaneous buying and selling of two different currencies. The first currency referenced in a currency pair is known as the base currency (EUR) and the second (USD) is known as the Quote currency. The price of the CFD on an FX pair is derived from the price of the underlying FX pair, which is the current spot price. An investor has the choice to buy (or go "long") the currency pair if they think the price of the base currency will rise in relation to the Quote currency; or to sell (or go "short") the currency pair if they think the price of the Quote currency will rise in relation to the base currency.

CFDs are leveraged products and leverage is customized and set by the client. At the end of the day any open positions are rolled over and charged a daily swap fee. Please note that margin trading requires extra caution, because whilst you can realize large profits if the price moves in your favor, you risk extensive losses if the price moves against you. Failure to deposit additional funds in order to meet the maintenance margin requirement as a result of a negative price movement may result in the CFD being auto-closed. This will occur when your remaining account equity falls below the maintenance margin requirement.

The CFD on FX pair does not have a pre-defined maturity date and is therefore open-ended. Klips retains the ability to unilaterally terminate any CFD contract where it deems that the terms of the contract have been breached.

Objectives

A CFD is a leveraged contract entered into with the Company on a bilateral basis. It allows an investor to speculate or hedge on rising or falling prices in an underlying FX through online trading platforms. The exposure is leveraged since the CFD only requires a small proportion of the notional value of the contract to be put down upfront as initial margin. For example, if an investor buys 1 lot of CFD (1 lot equals 100,000) on EUR/USD with an initial margin amount of 5 % and an underlying EUR/USD price of 1.19770/1.19780, the initial investment will be €5,000 or the equivalent in your account's currency. The effect of leverage, in this case 20:1 (1 / 0.05). Based on the trade size above for each 1-point change in the price of the underlying FX pair the value of the CFD changes by \$10. For instance, if the investor is long and the market increases in value, a \$10 profit will be made for every 1-point increase in that market. However, if the market decreases in value, a \$10 loss will be incurred for each point the market decreases in value. Conversely, if an investor holds a short position, a profit is made in line with any decreases in that market, and a loss for any increases in the market.

CFDs in general do not have a recommended holding period and it is down to the discretion of each individual investor to determine the most appropriate holding period based on their own individual trading strategy and objectives.

Intended Retail Investors

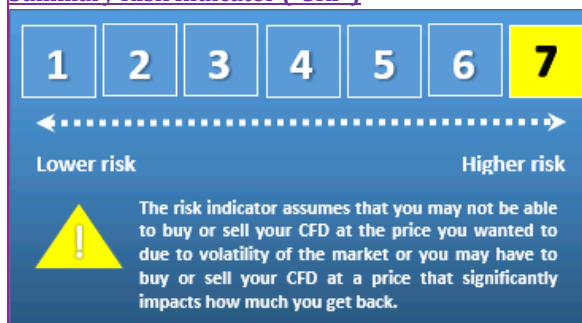

Trading in this product will not be appropriate for everyone. Trading these products will not be appropriate for everyone. We would normally expect these products to be utilised by persons to whom some or all of the following criteria apply: i) have experience with, and are comfortable trading on, financial markets and, separately, understand the impact and risks associated with margin trading; ii) have ability to bear 100% loss of all funds invested; iii) have a high risk tolerance; and iv) intend to use the product for short-term investment, speculative trading, portfolio diversification and/or hedging of exposure of an underlying asset.

Terms

FX CFDs offered by Klips have no maturity date or minimum holding period. During the available trading period for the Cryptocurrency CFD, you may open and close your positions, in other words closing a position is only possible within the product trade hours.. Klips may close your position without seeking your prior consent if you do not maintain sufficient margin in your account. Please consult the Klips website for trading times of these instruments. The product can be unilaterally terminated by Klips under special conditions.

What are the risks and what could I get in return?

Summary Risk Indicator ("SRI")

The SRI is a guide to the level of risk of these products compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified these products as 7 out of 7, which is the highest risk class. This is because there is a very high chance you could lose up to 100% of your trading account balance.

CFDs are complex instruments and come with a high risk of losing money rapidly due to leverage. In addition to market price, there are also other risks associated to this product for which there is no protection, such as: foreign exchange risk, market risk, leverage risk, market disruption risk, online trading platform, IT risk, and liquidity risk. Before deciding to trade CFDs, you should carefully consider your trading objectives, level of experience and risk appetite. Trading

CFDs requires you to maintain a certain level of funds in your account to keep your positions open. It is possible for you to sustain losses equal to your investment (deposit), therefore you should not deposit money that you cannot afford to lose and if there is a sudden adverse movement in the market you may be required to deposit additional funds at short notice. You should be aware of all the risks associated with CFDs and seek independent advice if you require further clarification. Please ensure you fully understand the risks and take appropriate care to manage your risk.

Be aware of currency risk. It is possible to buy or sell CFDs on an FX pair in a currency which is different to the base currency of your account. The final return you may get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above. This Product does not include any protection from future market performance so you could lose part or all of your investment.

Performance Scenarios

The scenarios shown below illustrate how changes in prices can affect your trading and investment. You can compare them with the scenarios of other products. The scenarios presented are an estimation of future performance based on evidence from the past on how the value of this investment varies and are not an exact indicator. What you get will vary depending on how the market performs and how long you hold the CFD. Klips will automatically liquidate positions if the equity in the account is insufficient to meet margin requirements.

- (i) Favorable scenario: is a situation where the market moves in the direction of the Investor's order and the order becomes profitable.
- (ii) Moderate Scenario: is a situation where the market remains relatively unchanged to the opening price of the Investor's order.
- (iii) Unfavorable scenario: is a situation where the market moves against the direction of the Investor's order and the order becomes unprofitable.
- (iv) Stress scenario: is a situation where the market moves considerable against the direction of the Investor's order and the market price is near the stop out level.

The following assumptions have been used to create the scenarios below:

FX CFD-EURUSD			
		Bid	Ask
Balance	351		
Opening Price	P	1.0501	1.0502
Trade Size	TS	10000	10000
Margin	M	3.3 %	3.3 %
Initial Margin	P x TS X M	350.0333	350.0667
Notional Value	P x TS	10501	10502
Overnight Financing (USD per 1 CFD)		-1.0921	-1.23924

Scenarios	LONG POSITION				SHORT POSITION			
	Closing Price	% Price change	Overnight Financing	Profit/Loss after costs (USD)	Closing Price	% Price change	Overnight Rollover	Profit/Loss after Costs
Favorable	1.06	0.93	-1.23924	96.76	1.04	-0.96	1.09	99.9
Moderate	1.05	-0.02	-1.23924	-3.23	1.06	0.94	1.09	-100.09
Unfavorable	1.04	-0.97	-1.23924	-103.23	1.07	1.9	1.09	-200.09
Stress	1.03	-1.92	-1.23924	-203.23	1.08	2.85	1.09	-300.09

The figures shown include all the costs of the product itself but do not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. Opening a long position holds that you think the underlying price will increase, and opening a short position holds that you think the underlying price will decrease.

***The loss is restricted to your account balance as we offer negative balance protection**

What happens if Klips is unable to pay out?

Client funds are always held in segregated bank accounts separately from the Company's own funds with credit institutions in Europe and follows CySEC rules on safeguarding clients' funds.

In the unlikely event of default of Klips due to insolvency, you may lose the value of your investment. Klips is a member of the Investor Compensation Fund (ICF) for Customers of CIFs which provides compensation to Retail Clients in the event Klips is in default. You may be entitled to compensation under the ICF where we are unable to meet our duties and obligations arising from your claim. Whether you can claim depends on the type of business and your personal circumstances. Any compensation provided to you will not exceed twenty thousand Euros (€20,000) or 90% of the claimed amount, whichever is lower. You can find more detailed information on the ICF's website; <https://www.cysec.gov.cy/en-GB/investor-protection/tae/> as well as through our Investor Compensation Fund Policy;

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

CFDs on Cryptocurrencies generally have no recommended holding period since you decide when to close your position(s). You should monitor the product to determine when is the appropriate time to close your position(s), which can be done at any time during normal trading hours (see our specific trading hours here). This may temporarily be unavailable in exceptional market situations though, during which you should contact us. You may withdraw at any time, any amount except the amount that is used as collateral for your open positions. There is no cooling of or cancellation period for the Product.

What are the costs?

Before you start trading you should familiarize yourself with all costs and fees associated with trading. These charges will reduce any net profit or increase your losses. For more information about the composition of costs and fees please visit Klips website.

Costs Over Time

Estimated Holding Period: 4 Weeks

Investment: \$351

Notional Amount: \$10501

Total Costs: -€30.57 (spread + commission + financing)

Impact on Return: -8.7%

This table shows the different types of cost categories and their meaning:

One-off costs	<i>Spread</i>	Standard Account	The difference between the buy (Ask) price and the sell (Bid) price. When a position opens, the spread "cost" is realised. Traders should note that in the event of low liquidity, spreads might significantly increase from their normal levels.
	<i>Commission</i>	Standard Account	A commission "cost" is based on volume transaction and is one charge for both opening and closing a position. Example: On retail Account, If you trade on EURUSD which contract size of 10,000 EUR, then your commission per side would be 0.5 EUR and 1 EUR round turn.
	<i>Currency conversion</i>	Standard Account	The Company does not charge any conversion fee
Ongoing costs	<i>Swap</i>	Standard Account	*SWAPs are determined by the overnight interest rate of each currency; the overnight rate is the interest rate that the banks would in theory lend and borrow from each other. A swap fee is charged when a position is held overnight. As an example, for FX, the swap charge is the interest rate differential between the two currencies of the pair.

Advisors, distributors or any other person advising on, or selling, the Product will provide information detailing any cost of distribution that is not already included in the costs specified above, so as to enable the retail investor to understand the cumulative effect that these aggregate costs have on the return of the investment;

How long should I hold it and can I take money out early?

There is no minimum period that you must keep this investment open and you can open and close it at any time while the market is open. You can request a withdrawal of available funds on your account during normal working hours and this will be processed the same working day or the next working day. There is no recommended holding period, no cancellation period and therefore no cancellation fees. However, overnight funding cost can eat away at long term exposures.

How can I complain?

For any questions you may have that we can help you with, you can communicate with the Company under the "Contact Us" page on our Website, Such as referring your enquiry via email to our Customer Service Department, or via a chat with a Customer Service representative.

Should you wish to submit an official complaint please request from our Customer Support Department to receive the designated Complaint Form then, duly complete, sign and send the form to the Customer Support officer you are in communication with regarding your dispute/complaint. More information about our complaint handling procedures can be found here.

If you do not feel your complaint has been resolved satisfactorily, you are able to refer your complaint to the Financial Ombudsman of the Republic of Cyprus. For further information, see <http://www.financialombudsman.gov.cy>

Other Relevant information

You should ensure that you read and understand the Company's Legal Documentation available in the Legal section on our website which you can find here together the Risk Disclosure Statement, Terms & Conditions, Client Categorisation, Complaint Handling Policy, Order Execution Policy, with the Key Investor Document and other documents before opening an account and start trading with the Company. You should ensure that you are familiar with all the terms and policies that apply to your account.

CFDs are complex instruments and come with a high risk of losing money rapidly due to leverage. The majority of the retail investor accounts lose money when trading CFDs with Klips. You should consider whether you understand how CFDs work and whether you can afford to take the high risk of losing your money.
